OPIS PRODUKTU

Pneumatic integrated air-saving function Energy Saving (ES) that minimizes the air consumption by controlling the incoming air flow to the pump. Separate port with built-in blow-off check valve. High flow capacity to maximize efficiency to release an object. LED display showing current vacuum level and part present. Standard M12 4-pin electrical connection. M8 converter as an accessory. S1 part present signal. 24V when S1 - vacuum level is achieved. S1 ES Not active signal. 24V when Energy Saving (ES) is Not active. Easy access to vacuum ejector for maintenance. Built in Silencer.

DANE TECHNICZNE

Poziom hałasu	80 do 90 dBA
Materiał	PE, SS, Aluminium, CUZN, NBRFKM
Pobór prądu	200 mA
Minimalne napięcie zasilania	21,6 do 26,4 VDC
Temperatura minimalna	-10 do 50 °C
Nominalne napięcie zasilania	24 VDC

Nr kat.	0209627
